

# ACE Top Bird Feeding Tips

- Bird feeding is for people who love watching birds**  
Always place your bird feeders in places where you can readily and frequently see the birds you are feeding.
- Start with the basics**  
Black-oil sunflower in a tubular feeder is a very effective combination for attracting a large number of birds to your yard.
- Attract more species by adding additional types of feeders and seeds** - Try thistle seed in a tube feeder, and mixture of black-oil sunflower and hulled sunflower, in hopper and platform feeders.
- Don't forget about alternative food and water**  
Suet, fruits, mealworms, nectar and water.
- Make you yard bird-friendly**  
Provide birds with a safe habitat, food, water, and nest boxes so birds will use your yard year-round. Keep you feeders clean.
